CONDITIONS GOVERNING LOANS

The National Parks Bureau of Canada owns and operates a motion picture film library containing a great variety of subjects descriptive of the magnificent scenery, recreational advantages, and wild life of the National Parks. These films are lent to conservation societies, universities, schools, writers, lecturers, and other organizations and individuals interested in wild life conservation and in making known the many attractions of Canada's national playgrounds.

No charge is made for the loan of these films, but express charges from Ottawa to the point of destination are paid by the recipient. Films may be returned at the expense of the National Parks Bureau.

All films listed in this catalogue are silent, unless otherwise specified, and are produced on non-inflammable (safety) stock. They are available for loan in both 16mm. and 35mm. sizes. As these films are in great demand it is advisable when making a selection to indicate a second and third choice in each case. It is essential that the size of film desired (16mm. or 35mm.) be indicated.

Unless otherwise stated the subject under each title is covered in one reel.

The average running time is twelve minutes per reel.

Applications for the loans of films should reach this office at least two weeks before exhibition date.

All films are lent on the distinct understanding that no deletions or additions shall be made in any way.

All films must be returned immediately after they have been exhibited, accompanied by a report of the number of times shown and the approximate attendance.

When returning films **the name of the person to whom the films were shipped** should be placed on the outside of the parcel in block letters; **not the name of the organization** to which he belongs.

All requests for films should be addressed to The Controller, National Parks Bureau, Department of Mines and Resources, Ottawa, Canada.

DO NOT REWIND FILMS

List of Films available from the National Parks Bureau, Ottawa, Canada

American Eider Duck, The (Bilingual titles)

The second of the "Canadian Sea Fowl" series, descriptive of the American eider duck—how it lives, nests and breeds—how eider-down is collected, cleaned, and made ready for use in the manufacture of eider-down quilts, pillows, etc.
